SUMMARY	Curious Python engineer with more than 12 years of experience in web development. I enjoy working within the Python ecosystem, but try not to silo myself into a single job description. Sticking to solid coding principles and using simple, well-understood tools is important in building stable products that in turn allow a team to focus their attention on delivering business value.
SKILLS	Languages: Python; Some exposure to Java, Scala, Go Python Ecosystem: Flask, Django, FastAPI, asyncio, celery, numpy, pandas, mypy Cloud and Devops: AWS, GCP, Kubernetes, Docker, Terraform, CircleCI Data: BigQuery, Redshift, Apache Beam Other: SQL, Elasticsearch, Kafka, Redis, Prometheus <i>Source code samples are available on my github (username: mbarga)</i>
EXPERIENCE	Lead Backend Engineer - Elsewhen, London, UK Aug 2023 - Present • Lead backend development of a marketing campaign planning tool on Google Cloud (Flask, FastAPI, BigQuery) • Designed and built integrations with social platform APIs enabling cross-channel campaign management • Implemented a reach calculation algorithm in collaboration with data scientists to forecast campaign performance from historical BigQuery data Senior Python Engineer - Cookpad Global, Bristol, UK Dec 2021 - Jun 2023 • Deliver new text-search related features to our global web portal users (Django, FastAPI) • Designed and implemented analytics dashboards interfacing with our data warehouse (pandas, Opensearch, Django) • Deploy and manage Kafka infrastructure including defining Avro schemas • Devops and infrastructure management with Kubernetes, Terraform, Docker and CircleCI Backend Engineer / Team Lead - commercetools, Berlin, Germany ... July 2018 - Dec 2021 • Designed and built image-based product search endpoint • Productionized and scaled APIs around machine learning models for the core platform (Python3/Flask) • Lead initiative to build a Data Analytics team delivering data pipelines for internal analytics • Interviewed and onboarded new members for the growing Data Analytics team Data Scientist - AXA Life, Tokyo, Japan May 2016 - July 2018 • Data scientist with AXA Life Insurance (Python, SQL, Spark, Hadoop, Hive) • Developed cross-selling models that realized up to 4x product uplift to meet target KPIs • Implemented and maintained ETL pipelines on a group-wide datalake platform to ingest, clean, and generate structured data tables from raw text sources • Generated reports on findings based on statistical analyses of business data Software Engineer (Fullstack) - Rakuten, Tokyo, Japan Apr. 2015 - May 2016 • Developer on Rakuten DSP digital marketing web service (Java/Spring, Javascript) • Extended application to integrate with new third party APIs for batch/real-time ad data ingestion • Implemented new endpoints for the core REST API • Ad-hoc reporting and ETL pipeline for 50TB of digital clickstream data (Hadoop, Hive, Spark) EDUCATION The University of Tokyo, Tokyo, Japan Sep. 2014 <i>Master of Science - Computer Science</i> Purdue University, West Lafayette, Indiana May 2011 <i>Bachelor of Science - Computer Engineering; Minor in Mathematics</i>
